Excerpt from *Brinkley Makes Headlines*

"I was 18 years old when I first came to New York City. I had never been away from home before, and I was scared and alone. But I was also determined to make it as a model.

I started out by going to every casting call I could find. I was rejected over and over again, but I never gave up. I knew that I had something special, and I was determined to prove it to the world.

Finally, I got my big break when I was cast in a television commercial for CoverGirl. That commercial launched my career, and I soon became one of the most sought-after models in the world.

I lived the high life for many years. I traveled the world, met amazing people, and made a lot of money. But I also struggled with body image issues and an eating disorder.

In 1998, I was diagnosed with Lyme disease. The disease nearly ended my career, but I fought back and eventually made a full recovery.

Today, I am still modeling, but I am also an author, photographer, and entrepreneur. I am also a mother of three children. I am proud of the life I have built, and I am grateful for the opportunities that I have been given.
