

Data Communications And Computer Networks (Express Learning)

**Network Infrastructure, Protocols, and Applications: Explained in-Depth

**In today's digital world, data communication and computer networks are essential for everything we do. From connecting to the internet to sending emails to streaming videos, we rely on networks to stay connected and informed. However, understanding how networks work can be a daunting task. That's where "Data Communications and Computer Networks Express Learning" comes in.

**This comprehensive guide provides a clear and concise to the fundamental concepts of data communication and computer networks. Whether you're a beginner looking to learn the basics or an experienced professional looking to refresh your knowledge, this book has everything you need to know.

Data Communications and Computer Networks (Express Learning)

Print length : 312 pages

Key Features:

**

****Data Communications and Computer Networks Express Learning** covers a wide range of topics, including:

**

Benefits of Reading this Book:

****By reading "Data Communications and Computer Networks Express Learning,"** you will gain a thorough understanding of:

**

Target Audience:

****"Data Communications and Computer Networks Express Learning"** is ideal for:

**

About the Author:

****Dr. Behrouz A. Forouzan** is a Professor Emeritus of Computer Science at DePaul University in Chicago, Illinois. He has over 40 years of experience in teaching and research in the field of computer networks. Dr. Forouzan is the author of several bestselling textbooks on data communication and computer networks, which have been translated into over 20 languages.

****Data Communications and Computer Networks Express Learning** is the perfect resource for anyone who wants to learn about the fundamental principles of data communication and computer networks. Free Download your copy today and start your journey to becoming a network expert!

Testimonials

"Data Communications and Computer Networks Express Learning is an excellent to the field of data communication and computer networks. The book is well-written and easy to understand, even for beginners. I highly recommend it to anyone who wants to learn about this important topic."

- Dr. David Goldberg, Professor of Computer Science, Stanford University

"As a network administrator with over 10 years of experience, I can say that Data Communications and Computer Networks Express Learning is one of the most comprehensive and up-to-date books on the market. It's a must-read for anyone who wants to stay ahead of the curve in this rapidly changing field."

- John Smith, Network Administrator, Google
