Routledge Studies in Sustainability Transitions

**Urban planning is facing a new set of challenges in the 21st century. Cities are growing rapidly, and this growth is putting a strain on resources and infrastructure. Climate change is also posing a threat to cities, as rising sea levels and more extreme weather events are becoming more common.**

**In response to these challenges, cities around the world are adopting new approaches to planning and development. These innovations are aimed at creating more sustainable, resilient, and equitable communities.**

**This book provides a comprehensive overview of the latest global planning innovations for urban sustainability. It explores how cities are using new technologies, policies, and programs to address the challenges of the 21st century. The book is essential reading for anyone interested in urban planning, sustainability, or the future of cities.**
