Robert F. Kennedy Jr., the book's co-author, argues that the rise in autism diagnoses is not due to an increase in the prevalence of the disFree

Download, but rather to a broadening of the diagnostic criteria and a lack of scientific rigor in research.

The Vaccine-Autism Hoax: A Tragic Betrayal

One of the most controversial aspects of the autism epidemic is the link between vaccines and autism. CHD meticulously examines the evidence and finds that there is no credible scientific basis for this claim.

The book reveals how the vaccine-autism hoax was perpetrated by a small group of scientists with vested financial interests. These scientists conducted flawed research, ignored contradictory evidence, and misled the public through the media.

The Suppression of Dissent: Silencing the Truth

CHD also exposes the systemic suppression of dissent in autism research. Scientists who dared to question the prevailing narrative were marginalized, ridiculed, and even threatened with professional ruin.

The book documents numerous cases where researchers who published studies showing no link between vaccines and autism were subjected to harassment, threats, and even loss of funding.

The Cost of Corruption: Harming Children and Society

The consequences of the corruption in autism research have been devastating. Misinformed parents have been led to refuse vaccines, putting their children at risk for preventable diseases.

The book also shows how the autism epidemic has been used to justify the expansion of government surveillance and control over children's lives.

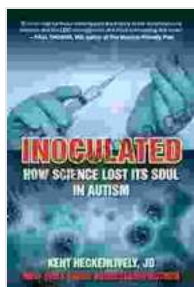

A Call for Truth and Accountability

How Science Lost Its Soul In Autism is a powerful indictment of the corruption that has plagued autism research. It calls for a return to scientific integrity, transparency, and accountability.

The book concludes with a series of recommendations for how to restore trust in science and protect the health of children.

How Science Lost Its Soul In Autism is a must-read for anyone concerned about the integrity of science and the well-being of our children. It is a powerful exposé that exposes the truth about the autism epidemic and the forces that have perpetuated it.

It is time to hold the perpetrators of this scientific fraud accountable and to demand a return to evidence-based medicine and informed consent.
