Lung cancer is the leading cause of cancer death worldwide, and its incidence is rising. This book provides a comprehensive overview of the latest translational and emerging therapies for lung cancer, written by leading experts in the field.

The book begins with a discussion of the molecular basis of lung cancer, followed by chapters on targeted therapy, immunotherapy, and precision medicine. The authors then discuss the latest clinical trials and emerging therapies for lung cancer, including CAR T-cell therapy, oncolytic viruses, and stem cell transplantation.

This book is an essential resource for healthcare professionals who are involved in the care of patients with lung cancer. It provides a comprehensive overview of the latest translational and emerging therapies, and it will help healthcare professionals to make informed decisions about the best treatment options for their patients.

Table of Contents

- Molecular Basis of Lung Cancer
- Targeted Therapy

- Immunotherapy
- Precision Medicine
- Clinical Trials and Emerging Therapies
