React Native is a framework for building native mobile apps using JavaScript. It combines the power of React with the performance of native code, making it possible to create apps that feel like they were written in Objective-C or Java.

React Native In Action is a comprehensive guide to building native apps with React Native. It covers everything from the basics of React Native to advanced topics such as animations, performance optimization, and testing.

What You'll Learn

- The basics of React Native, including its architecture, components, and APIs

- How to create your first React Native app

- How to use React Native to build common UI elements, such as buttons, lists, and forms

- How to handle user input, such as gestures and keyboard events

- How to style your React Native apps

- How to optimize the performance of your React Native apps

- How to test your React Native apps
