Elder argues that wilderness is not simply a pristine and untouched landscape, but rather a complex and ever-changing environment that is constantly being shaped by human interaction. He also challenges the idea that the wild is something to be feared or avoided, arguing instead that it is a vital part of our human experience.

Rethinking Wilderness and the Wild is a must-read for anyone who cares about the environment, the human spirit, or the future of our planet. In this thought-provoking and inspiring work, Elder offers a new way of thinking about wilderness and the wild that will change the way we see the world forever.
