The good news is that there is a solution: the low FODMAP diet.

## What is the Low FODMAP Diet?

The low FODMAP diet is a scientifically proven diet that can help reduce symptoms of IBS and other digestive disFree Downloads. FODMAPs are a group of short-chain carbohydrates that are poorly absorbed in the small

intestine. When these carbohydrates reach the large intestine, they can cause fermentation, leading to gas, bloating, and other digestive problems.

The low FODMAP diet involves eliminating high-FODMAP foods from your diet for a period of time. This helps to reduce the amount of gas and bloating you experience, and can significantly improve your symptoms.
