Print length : 1300 pages

Wireless Communications Networking ISSN is the premier journal for disseminating the latest research in wireless communications and networking. The journal publishes original research papers, review articles, and tutorials on all aspects of wireless communications and networking, including:

* Wireless network architecture and protocols * Wireless channel modeling and propagation * Wireless network security * Wireless network performance evaluation * Wireless network applications

Wireless Communications Networking ISSN is a peer-reviewed journal, which means that all papers are reviewed by experts in the field before they are published. This ensures that the journal publishes only the highest quality research.

History

Wireless Communications Networking ISSN was founded in 1992. The journal was originally called the Journal of Wireless Communications and Networking, but it was renamed to Wireless Communications Networking ISSN in 2004. The journal is published by John Wiley & Sons.

Scope

Wireless Communications Networking ISSN covers all aspects of wireless communications and networking, including:

* Wireless network architecture and protocols * Wireless channel modeling and propagation * Wireless network security * Wireless network performance evaluation * Wireless network applications

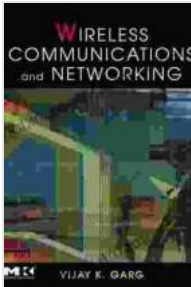

The journal publishes original research papers, review articles, and tutorials. Original research papers report on new research findings, while review articles summarize the state-of-the-art in a particular area of wireless communications and networking. Tutorials provide an to a particular topic for readers who are new to the field.

Impact

Wireless Communications Networking ISSN is a highly respected journal in the field of wireless communications and networking. The journal has a high impact factor, which means that its papers are frequently cited by other researchers. The journal is also ranked among the top journals in the field by the Science Citation Index.

Wireless Communications Networking ISSN is the premier journal for disseminating the latest research in wireless communications and networking. The journal publishes original research papers, review articles,

and tutorials on all aspects of wireless communications and networking. The journal is a peer-reviewed journal, which means that all papers are reviewed by experts in the field before they are published. This ensures that the journal publishes only the highest quality research.
